NEW! THE REVISED NATIONAL STANDARDS

National Curriculum Standards for Social Studies: A Framework for Teaching, Learning, and Assessment
Developed by the NCSS Task Force for Social Studies Standards

NCSS Bulletin 111,
171 pp., 2010

Published in September 2010, the revised national social studies standards are an essential resource for schools, social studies teachers, school districts and teacher education programs. They offer the framework for developing social studies programs that educate students in the skills and knowledge needed for college, careers, and 21st-century citizenship.

The revised standards, like the earlier social studies standards published in 1994, continue to be structured around the ten themes of social studies. However, the revised standards offer a sharper focus on:

- Purposes
- Questions for Exploration
- Knowledge: what learners need to understand
- Processes: what learners will be capable of doing
- Products: how learners demonstrate understanding

The revised standards also include:

- Enhancements in the descriptions of the ten themes and the associated learning expectations
- The addition of new descriptions of standards-based class practices to time-tested descriptions that were included in the original edition of the standards
- A stronger focus on student products and their assessment
- An updated list of essential social studies skills and strategies, including literacy strategies

This volume should be part of the core library of all social studies educators, schools and colleges.
